

Isoflex S

Adhesive patch for covering details

Description :

Adhesive Patch Isoflex is a bitumen-based and self-adhesive product. The adhesive patch is a malleable plate with acrylic-based colour, covered with slate grit and varnish.

Application :

Adhesive Patch Isoflex is used for Isola Roofing Shingles. For covering details and transitions (for example, at T, Y and X ridges), as well as hip roof solutions with Isola Ridge Profile Aerators.

Storage :

The product should be stored on an even surface and should not be exposed to direct sunlight.

Approvals and guarantee

Installation :

Heat with a heat gun and shape according to the detail or the transition.

Fore more details see laying instruction on our website.
