

# Platon Sealer

Butyl-based sealant for gluing and sealing

## Description :

Platon sealant is a flexible sealant made from butyl rubber mixed with organic and synthetic oils.

## Application :

For use together with the Platon systems

## Storage :

The cartridges should be stored warm, preferably at room temperature.  
Shelf life of 1 year at +20 °C

## Approvals and guarantee

## Installation :

The surface must be clean, grease-free and dry. Filled joints need a minimum of 6 mm contact surface on each side. The sealant must be pressed firmly into the joint, so that it is completely filled up to give a smooth surface. After 24 hours, the sealant becomes surface dry (at +20 °C).

For more details see laying instruction on our website.

## Accessories for :

Platon Multi 2.05 x 20 m  
Drenspl. P20 1,36x2,18m Platon
