

# MEMBRA® Internal Corner

Internal Corner for Membra® membrane system

## Description :

Membra Internal Corner consists of PE foam and polyolefin adhesive protected with silicone-treated paper. The gaskets are designed to provide a robust and waterproof corner solution.

## Application :

Membra Internal Corner is part of the Membra Wet Room System. The product is used to ensure robust and waterproof connections in internal corners between floors and walls. The gaskets provide excellent adhesion to solid substrates such as concrete, screed, wet-room panels, plasterboard and waterproof wood boards approved for use in wet rooms, old tiles etc.

## Storage :

Dry and protected from UV

## Approvals and guarantee

## Installation :

To install Membra Internal Corner, first remove the silicone paper from the adhesive panels. Then stick the gasket firmly to the internal corner. Use a profiling tool to stick the gasket down firmly. See separate installation instructions.

NB: The substrate must be firm, clean, dry and free from grease. On floors or absorbent substrates, Membra Adhesive Primer must always be used.

For more details see laying instruction on our website.
