

Platon Top Moulding, foldable

HDPE fitting for top finish between insulated foundation wall and masonry wall.

Description :

HDPE fitting for top finish between insulated foundation wall and masonry wall. A 15° fall ensures that the water always runs off the fitting.

Application :

For sealing and closing gaps, and for draining water from the wall beyond the insulation and foundation plate.

Storage :

Temperate, dry and protected from UV

Approvals and guarantee

Installation :

The product should be screwed or nailed fast with an overlap at the joins using a suitable fastener.
