# Roof Vent 200/160

## For ensuring ventilation of cold attics or sanitary rooms

### Description :

Roof vent LV200/160 is designed for a humid climate where there is a requirement for a lot of air exchange. The rainwater is led away from the ventilation opening and the product has a grille that protects against insects. The profile fits Isola Roofing Shingles.

### Application :

The vent is adapted to Isola Roofing Shingles and comes with a multi-adapter that fits a pipe dimension of 100–160 mm. For ventilating cold attics/cavities in the roof surface.

### Storage :

When storing in sunlight, the roof vent must be unpacked from the plastic.

### Installation :

Install the roofing shingles up to the front edge of the roof vent. Fit the roof vent. Apply two strips of Isola Sealant, then place the roofing shingles on the roof vent collar. See separate installation instructions.

Fore more details see laying instruction on our website.
