

Platon Flexi Heat

Decoupling mat designed for heating cable installation

Description:

Platon Flexi Heat is a decoupling membrane with shear force control technology. The matting incorporates a PP dimpled sheet designed for heating cables between 2-5mm with a non-woven PP fleece backer.

Application:

To be used on concrete, screed, OSB, Chipboard, Plywood and for refurbishing older wood or tiled surfaces.

Installation:

To be installed on a prepared floor using tile adhesive. Spread adhesive and use a notched trowel between 4x4mm and 6x6mm depending on the substrate and adhesive type. Thoroughly embed the matting into the adhesive ensuring full coverage. Always follow the requirements of the tile adhesive supplier.

For more details see laying instruction on our website.

Storage:

To be stored upright with original packaging, in a dry place protected from sunlight
